EXPERIENCE

Finalist
YearOne (Techstars 2020) | January 2021 - Present

➤ Selected from nearly 800 candidates as a YearOne finalist

➤ YearOne recruits engineering bootcamp graduates with a rigorous technical interview. Finalists are mentored throughout their job search and given opportunities to apply directly to partner companies. Upon employment, finalists receive 6-months of on-the-job mentorship to help support them in the early days of their new career.

Software Developer Intern
LiveStack | March 2020 - April 2020

➤ Built v1.0 of a web application from the ground up for creators to easily monetize their content with a team of 7 engineers and stakeholders.

➤ Built the navigation bar, front-end sign up flows for various user types, and dashboard components with React, implementing form validation and feedback with Formik and Yup.

➤ Integrated the Netlify Identity API and lambda functions into the application, streamlining user authentication, role management, and password security, along with security for our Node/Express backend.

➤ Managed user updates with Netlify Identity and our RESTful Backend API in tandem.

Registrar & International Student Coordinator
Napa Christian Campus of Education(K-12) | March 2016 - August 2019

➤ Designed and launched a new project-based learning model of instruction which increased enrollment and student retention by 9%.

➤ Effectively prioritized time sensitive tasks ranging from record keeping, to teaching, to database management, to event planning and marketing.

➤ Worked with stakeholders and prospective clients to ensure each learner's unique needs and goals would be met by our program.

Executive Program Assistant & Administrative Coordinator
LEAPNOW: Transforming Education | June 2014 – December 2015

➤ Maintained website and social media presence, creating uniformity in branding and design.

➤ Compiled documentation to assist clients through financial aid and international visa processes by interpreting many disparate and often confusing resources.

EDUCATION

Rithm School, San Francisco — *Full Stack Development*
January 2020 - April 2020
A full stack web development bootcamp teaching JavaScript and Python.

Goddard College, Plainfield, VT — *B.A., Individualized Studies*
August 2016
Self-designed course of study culminating in a 90-page thesis examining the American study abroad industry in India.

➤ JavaScript
➤ Python 3
➤ SQL
➤ HTML
➤ CSS

Libraries and Frameworks
➤ React
➤ Redux
➤ Node.js
➤ Express.js
➤ Flask
➤ Jinja
➤ PostgreSQL
➤ SQLAlchemy
➤ Jest
➤ Jasmine
➤ React Testing Library
➤ jQuery
➤ Bootstrap
➤ React-Bootstrap
➤ Axios
➤ Sass/SCSS

Tools
➤ Git/Github
➤ npm

PROJECTS

Fantasy Bingo – *a reading challenge progress tracker*
Built with React

Warbler – *a Twitter clone*
Built with Python and Flask.

Jobly — *a full stack job search site*
Built with React, Express, and PostgreSQL
